Education

National University of Modern Languages (NUML)

Islamabad, Pakistan

Bachelor of Science in Software Engineering

Expected Dec 2026

Relevant Coursework

- Computer Networks
- Database Management Systems
- Cloud Computing
- Human-Computer Interaction
- Software Quality Assurance
- IP Networking & Routing

Experience

NAVTTTC

2026

AI & Robotics Trainee

Islamabad, Pakistan

- Completed hands-on training in **AI, computer vision, and robotics** including pose estimation and motion control systems.
- Worked with **MediaPipe, OpenCV, and Python** for real-time gesture and joint angle detection.
- Gained practical experience integrating **AI vision systems** with hardware control using Arduino and servo motors.

Vyrothon 2026 – NSTP NUST

April 2026

Frontend Engineer (Hackathon)

Islamabad, Pakistan

- Built **CypherStack**, a 3-layer encryption/decryption web tool with reverse cipher support in a single-day sprint.
- Delivered a fully responsive **HTML/CSS/JS** frontend under competitive conditions at a national-level hackathon.

Projects

SignLingua–Urdu | Python, TensorFlow Lite, ConvNeXt, MediaPipe, Flutter

2025 – 2026

- Developing a **two-way Urdu sign language interpreter** mobile app for real-time Urdu alphabet recognition via camera.
- Training a **ConvNeXt** model with **MediaPipe** hand landmarks; optimizing to **TensorFlow Lite** for on-device inference.
- Implementing text-to-sign conversion using static gesture images with a clean, accessible Flutter UI (FYP Project).

ModelMatch – AI Model Recommender | Next.js, TypeScript, MongoDB, Gemini API

2026

- Built a full-stack AI recommendation web app with a **5-step wizard**, Google OAuth, and role-based access control.
- Integrated **Google Gemini API** for real-time AI chatbot; secured routes with **Zod** and bcrypt; deployed on **Vercel**.

AI Rehabilitation Exoskeleton Arm | Python, MediaPipe, OpenCV, Arduino, Flutter

In Progress

- Building a **2-DOF robotic exoskeleton** for stroke patient rehabilitation using AI-based pose estimation.
- Implementing **MediaPipe/OpenCV** motion tracking to extract joint angles and control servo motors via Arduino.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, SQL, HTML/CSS

Frameworks: Next.js, React.js, Tailwind CSS, TensorFlow Lite

ML & AI: NumPy, Pandas, Scikit-learn, MediaPipe, ConvNeXt, OpenCV

Cloud & DevOps: Firebase, Vercel, Azure, Oracle Cloud (OCI), Docker, Git/GitHub, CI/CD

Certifications & Awards

AI & Robotics | NAVTTTC

2026

Machine Learning | Coursera

2025

Hackathon Participant – Frontend Engineering Track | Vyrothon 2026, NSTP NUST

2026
